Pașii aplicării învățării bazate pe proiecte

- 1) Alegerea temei.** Studenții, ghidați de profesor, examinează câteva teme de proiecte și o selectează pe cea mai interesantă pentru ei, care să fie comensurabilă cu potențialul lor de muncă. (Formularea întrebării-cheie)
- 2) Stabilirea obiectivelor.** Profesorul și liderul de grup desemnează obiectivele proiectului în funcție de experiența și capacitățile studenților.
- 3) Planificarea activităților.** Liderul de grup, asistat de profesor, distribuie responsabilitățile (sarcinile) în cadrul grupului, identifică sursele de informare, stabilește un calendar al activităților. Toți membrii grupului discută și determină strategia și metodele de lucru.

Pașii aplicării învățării bazate pe proiecte

- 4) **Realizarea și implementarea proiectului.** Fiecare student lucrează asupra sarcinii sale, apoi îi transmite liderului de grup produsul final. Acesta din urmă coordonează asamblarea tuturor modulelor proiectului. Pe parcursul acestei etape, membrii grupului sunt în contact permanent, direct sau on-line, lucrând asincron și/sau sincron.
- 5) **Testarea proiectului și prezentarea rezultatelor.** Produsul final este analizat, testat și evaluat de grup, apoi de profesor. Apoi, se face public, în cadrul unei sesiuni deschise, la care participă toate grupurile, eventual și alte persoane interesate de temele abordate (studenți, profesori).
- 6) **Evaluarea.** Este o etapă deosebit de importantă, mai ales dacă dorim organizăm nu doar o evaluare a învățării, ci și o evaluare pentru învățare. Pe lângă evaluarea tradițională de către profesor, recomandăm: autoevaluarea (de către fiecare membru al grupului); evaluarea colegială între grupuri; evaluarea colegială între membrii grupului.
